FAST & LETHAL

6-DAY MUAY THAI POWER, SPEED & EXPLOSIVENESS BLOCK

6

DAY SPLIT

FULL

EQUIPMENT

POWER

+ SPEED FOCUS

Be first. Be explosive. Land soft, fire hard.

THE METHOD

- 1 Explosive work comes first.** Jumps, sprints, throws and Olympic lifts go at the *front* of every session, when the nervous system is fresh. Power is trained fast — never on tired legs.
- 2 Speed is the target, not fatigue.** Every rep of plyo and sprint work is max intent with *full* recovery. When bar or foot speed drops, the set is over. Grinding here builds nothing.
- 3 Train one leg at a time.** A kick, a check, a level change — fighting happens on one leg. Unilateral work exposes and fixes side-to-side gaps that a barbell hides.
- 4 Land before you launch.** Reactive strength (depth jumps, bounds, pogos) teaches the tissues to absorb force and return it instantly — that's a snappier, quicker athlete.
- 5 Keep a strength base.** Force is the ceiling on power. Heavy hinge, squat and press stay in — maintained, not maxed — so there's more to convert into speed.
- 6 Manage total load.** This stacks on daily Muay Thai. Sleep 7-9 hrs, don't pile hard plyos on hard sparring days, and if you're flat — drop a day. Autoregulate.

LOADING KEY

% 1RM

Percentage of your one-rep max for that lift.

RPE

Rate of perceived exertion, 1-10. RPE 8 = 2 reps left in the tank.

Tempo / X

Eccentric-pause-concentric seconds. X = move it explosively.

Speed

Max intent, quality over reps. Stop the set the moment speed drops.

Reactive

Plyo cue — minimal ground contact, absorb and return force fast.

Zone 2

60-70% max HR — conversational, nasal-breathing pace.

RPE-set = pick a load that leaves ~2 reps in reserve at the listed rep count.

THE WEEK

01	Lower Power & Plyometrics <i>Jumps + heavy hinge/squat + single-leg</i>	SPEED
02	Upper Power & Speed <i>Ballistic press/pull + throws + unilateral</i>	SPEED
03	Sprints & Acceleration <i>Sprints, resisted starts, bounds, pogos</i>	SPEED
04	Upper Strength & Clinch <i>Press/pull/row + carries, neck + Zone 2 run</i>	HEAVY
05	Reactive & Rotational Power <i>Depth jumps, cleans, rotational throws</i>	SPEED
06	Lower Unilateral Strength <i>Single-leg strength grind + Zone 2 run</i>	HEAVY
07	Rest <i>Complete rest or light stretching</i>	OFF

Explosive days (1, 3, 5) are nervous-system days — put them opposite your hardest sparring, not stacked on it. If a fight-week or a brutal pad session lands on a plyo day, swap for a Zone 2 run and hit the jumps fresh.

No heavy bag needed — all conditioning runs off low-impact tools: **ski erg, sled, assault bike, rower**, plus two easy **Zone 2 runs** for the aerobic base. Cranky shins or knees from kicking? Swap any run for the row / bike / ski erg.

DAY 01 | **LOWER POWER**

	EXERCISE	SETS × REPS	LOAD	REST	RPE / TEMPO
01	Box Jump — Max Height <i>Explode up, land soft, full reset every rep</i>	5 × 3	Bodyweight	2:00	Speed
02	Trap-Bar Deadlift <i>Drive the floor away — make the bar fly</i>	5 × 3	80-85%	3:00	8 • X
03	Barbell Back Squat <i>Controlled down, explode the drive up</i>	4 × 4	78-82%	2:30	8 • 2-0-X
04	DB Bulgarian Split Squat <i>Tall torso, own the depth, drive tall</i>	3 × 6/leg	RPE 8	1:30	8 • 2-0-1
05	Single-Leg Box Step-Up Jump <i>Drive the knee, minimal push off back leg</i>	3 × 5/leg	Bodyweight	1:30	Max
06	Barbell Hip Thrust <i>Ribs down, squeeze glutes hard at top</i>	3 × 8	~70%	1:30	8 • 1-1-1
07	Pallof Press <i>Anti-rotation — resist the twist</i>	3 × 12/side	Moderate	0:45	8 • iso

REACTIVE FINISH **Ankle Pogo Series** — 3 × 20, stiff ankles, minimal ground time. Springy, not tired — skip if legs are fried.

DAY 02 | **UPPER POWER**

	EXERCISE	SETS × REPS	LOAD	REST	RPE / TEMPO
01	Plyo Push-Up <i>Drive off the floor, land soft & reload</i>	5 × 3	Bodyweight	2:00	Max
02	Barbell Bench Press <i>Controlled bar path, explode off the chest</i>	4 × 4	80%	2:30	8 · 2-0-X
03	Weighted Pull-Up (explosive) <i>Pull chest to the bar fast, full hang</i>	4 × 5	RPE 8 Load	2:30	8 · X-0-2
04	Med-Ball Chest Pass <i>Max intent into the wall, catch & fire</i>	4 × 5	Max	1:30	Speed
05	Single-Arm DB Push Press <i>Drive from the legs, punch it overhead</i>	3 × 6/side	RPE 8	1:30	8 · X-0-1
06	Med-Ball Rotational Throw <i>Rotate from the hips — that's punch power</i>	4 × 5/side	Max	1:15	Max
07	Neck Harness Raise <i>Slow & controlled, never jerk the load</i>	3 × 12-15	Light	1:00	8 · 2-1-2

POWER FINISH **Ski Erg** — 8 × 15s hard / 45s easy. Upper-body driven, pairs with today — drive from the hips, snap the pull.

DAY 03 | SPRINTS & ACCELERATION

	EXERCISE	SETS × REPS	LOAD	REST	RPE / TEMPO
01	Acceleration Sprint — 20 m <i>Low drive-out, punch the ground back</i>	6 × 20 m	Max effort	3:00	Max
02	Resisted Sled Sprint — 15 m <i>Stay low, aggressive knee drive</i>	5 × 15 m	Heavy sled	2:30	Max
03	Flying Sprint — 20 m build <i>Ease in, hit top speed relaxed</i>	4 × 20 m	~95%	2:30	Speed
04	Single-Leg Broad Bound <i>Cover ground, stick each landing</i>	3 × 5/leg	Bodyweight	1:30	Max
05	Skater Bound (lateral) <i>Push wide, stick, no wobble</i>	3 × 6/side	Bodyweight	1:15	Max
06	Pogo Hops <i>Stiff ankles, minimal ground time</i>	3 × 20	Bodyweight	1:00	Reactive

ALACTIC CONDITIONING

8 × 10s max sprint on the **assault bike, rower or ski erg** — **1:50 rest**, near-full recovery. This is speed, not a smoker — every rep is fast or you stop.

DAY 04 | UPPER STRENGTH

	EXERCISE	SETS*REPS	LOAD	REST	RPE / TEMPO
01	Weighted Pull-Up <i>Full hang, pull to the collarbone</i>	4 × 5	RPE 8 load	2:30	8 · 2-1-2
02	Overhead Press (BB) <i>Ribs down, glutes tight, no lean-back</i>	4 × 5	78-82%	2:30	8 · 2-0-1
03	Barbell Pendlay Row <i>Explosive pull, reset on the floor</i>	4 × 6	~72%	2:00	8 · X-0-2
04	Single-Arm DB Row (gorilla) <i>Braced, no rounding, drive the elbow</i>	3 × 8/side	RPE 8	1:30	8 · X-0-1
05	Clinch Isometric Hold <i>Fight the break — max tension</i>	4 × 30s	Heavy band	1:00	Max iso
06	Suitcase Carry (single-arm) <i>Don't lean — resist the tilt</i>	3 × 30 yd/side	Heavy	1:00	8 · carry
07	Neck Harness — 4 way <i>Slow, controlled, all directions</i>	4 × 15s	Light	1:00	8 · iso

AEROBIC BASE

Zone 2 run — 25-35 min @ 60-70% max HR (RPE 3-4). Legs are fresh today, so this is the day to run. Sub the rower / bike / ski erg if shins or knees are cranky from kicking.

REACTIVE & ROTATIONAL POWER

	EXERCISE	SETS × REPS	LOAD	REST	RPE / TEMPO
01	Depth Jump (30–45 cm box) <i>Step off, minimal contact, jump instantly</i>	5 × 3	Bodyweight	2:30	Reactive
02	Hang Power Clean <i>Speed beats grind — catch tall</i>	5 × 3	75–80%	2:30	Speed
03	Broad Jump <i>Max distance, stick the landing</i>	4 × 3	Bodyweight	2:00	Max
04	Rotational Med-Ball Scoop Throw <i>Load the hip, fire across the body</i>	4 × 5/side	Max	1:15	Max
05	Single-Leg Lateral Bound → Stick <i>Control the landing, own the balance</i>	3 × 5/side	Bodyweight	1:15	Max
06	Cable Woodchopper (fast) <i>Rotate hips-first, snap it through</i>	3 × 10/side	Moderate	0:45	8 · X

FIGHT CONDITIONING

5 × 30s max / 90s rest — sled push, ski erg or assault bike. Explosive, fight-paced, low-impact. Full recovery between rounds keeps the output high.

LOWER UNILATERAL STRENGTH

	EXERCISE	SETS×REPS	LOAD	REST	RPE / TEMPO
01	Rear-Foot Elevated Split Squat <i>Own the depth, drive up tall</i>	4 × 6/leg	RPE 8	2:00	8 · 2-0-1
02	Single-Leg RDL (DB / KB) <i>Hinge, feel the hamstring, square hips</i>	4 × 8/leg	RPE 8	1:30	8 · 3-1-1
03	Loaded Step-Up (knee-high) <i>No push off the bottom foot</i>	3 × 8/leg	RPE 8	1:30	8 · 2-0-1
04	Skater Squat (to box) <i>Slow, controlled, stay balanced</i>	3 × 8/leg	Bodyweight	1:15	8 · 3-0-1
05	Single-Leg Calf Raise <i>Full ROM, pause the stretch</i>	3 × 12-15	RPE-set	1:00	9 · 1-2-1
06	Copenhagen Plank <i>Groin health for the kickers</i>	3 × 20s/side	Bodyweight	0:45	8 · iso
07	Hanging Leg Raise <i>Control the lower, no swing</i>	3 × 10-12	Bodyweight	1:00	8 · slow

AEROBIC BASE

Zone 2 run — 30-40 min @ 60-70% max HR (RPE 3-4). Builds the engine that lets you repeat power into the later rounds. Legs worked hard today — keep the pace truly easy, or sub the ski erg / row / bike.

DAY
07

REST

Complete rest or light stretching only. Explosiveness is built when the nervous system recovers — not in the gym.

BEFORE EVERY SESSION

THE WARM-UP — R.A.M.P.

8–12 min. Leave it sweating lightly and primed — not gassed.

RAISE

3–4 min

Easy bike, row or rope — or 3 rounds: 20 jumping jacks → 10 squats → 10 arm circles each way.

MOBILIZE

4–5 min

Leg swings 10/side • World's Greatest Stretch 5/side • cat-cow + thread the needle 5/side • glute bridges ×15 • band pull-aparts ×20 • walking lunge w/ reach 6/side.

POTENTIATE

3–4 min

Prime the nervous system for max output. Ramp low-effort jumps or throws before plyo days; build-up runs before sprints; 2–3 ascending sets before a heavy lift (empty bar → 50% → 70% → work).

DAY TWEAKS

Lower / Plyo (D1, D5) — 2×5 low pogos + 3 sub-max box jumps before going max

Sprints (D3) — A-skips ×20 m, 3 build-ups to ~90% before full-effort runs

Upper (D2, D4) — scap pull-ups ×8 + band dislocates ×10 + 5 light med-ball passes

Unilateral (D6) — 8 hip CARs/side + 10 bodyweight split squats/leg

Never static stretch (long holds) before jumps, sprints or heavy work — it briefly cuts power and speed. Save the long holds for after training or the rest day.

THE PART THAT DECIDES RESULTS

THE EXPLOSIVE CHECKLIST

- ☐ Explosive work first, every session – jumps, sprints, throws on fresh legs.
- ☐ Full recovery on power & sprint sets. Speed dropped = set is over.
- ☐ Every plyo landing soft & controlled – quality over contact count.
- ☐ Both sides trained equal – chase down the weaker leg.
- ☐ Heavy strength maintained – force is the ceiling on power.
- ☐ 7-9 hrs sleep – speed & power live in the nervous system.
- ☐ Total load managed vs daily Muay Thai. Deload every 4-6 weeks.

THE ONE RULE

Power is a **quality**, not a smoker. The second your jumps get lower, your sprints get slower, or your bar stops flying – **stop the set**. Training explosiveness through fatigue just trains you to be slow.
